

St Mary's Catholic Church

Published 05 July 2010

St Mary's Catholic Church is a new Church and Parish Complex built in December 1998, Consecrated March 1999. Our Buildings might be fairly new (12 years), but our faith and our original St Mary's, on the same site, reminds us of the long history of our parish and of our Catholic Faith that goes back to the time of the Apostles. Our Church building is a real focal point on Ewenny Road. The round tower, built from the Ewenny stone of the original church, with the cross, made locally at Merthyr Mawr, illuminated at night, is a fine symbol of our Catholic Faith. Fr. William Isaac (St Mary's Catholic Church Bridgend) and TCRM web design and construction have developed a number of innovative features that makes the parish website highly interactive and interesting. Kevin and Andrea worked very closely with me to create a site that delivers what I need, and nothing was too much trouble for them. I was very impressed with the quality of work created by TCRM. It is great to deal with a team that is so responsive to the customer's needs, delivers results in a timely manner and is willing to make process so easy and effortless. I will certainly do business with TCRM web design and construction again.
