

# January 2011

Published 08 February 2011

Evening all, a few days ago I had the pleasure of seeing Lenny Henry live in his Cradle to the Rave Tour. Being of a certain age, that is a little bit younger than Lenny, the music was fab. However, it struck me how much great music there has been over the last few hundred years. It made me wonder what people did before song. It's a bit like what people did before Google. How would any of us find anything without search engines? A great web site is no good if you cannot find it. That's why all TCRM sites are designed from the ground up to be search engine friendly. There are a lot of web design companies that offer extended SEO services and so do we, but our sites start out as natively GFG (Good for Google). So if you want a web site that people will find, talk to TCRM - Bridgend experts in web sites (and lovers of great music). Have a great month.
